JAIRO Cloud is a cloud service of institutional repositories that is built based on WEKO (repository software) developed by the National Institute of Informatics (NII). It is suitable for institutions that have difficulties in creating and operating their own repositories. It can also be used by institutions which already built repositories to create new repositories without having to build their own infrastructure. It is particularly useful for institutions that have difficulties in creating and operating their own repositories.

Advantages of JAIRO Cloud
- Storage of originals of registered content at individual repositories
- Data batch
- Assignment of permalinks (fixed URLs)
- Data integration with JAIRO/CiNii, etc.
- Browser-based customization of screen layout, etc.
- User registration, peer review approval
- Exporting of metadata in various formats
- Standard release or custom release
- Individual or batch content / metadata registration
- Automatic doctoral thesis deposit
- Metadata for JAIRO Cloud

“WEKO” Repository Software
- WEKO is a repository software, developed in Japan, that supports the management of research outputs (such as research papers, research bulletins, research reports, theses, and the like). It provides a wide range of functions such as metadata creation, upload, and distribution. It can be used to create new research styles through the NetCommons2 next-generation information sharing platform.

Have a Look at the Community Site!
Announcements regarding the JAIRO Cloud system, operating guides, and other information are available at the community site. The community site also provides answers to inquiries about the JAIRO Cloud. There are usage applications, manuals, and other documents, as well as an easy-to-understand video manual!
How to Apply

You can apply for the service after logging in.

Regarding the User Agreement, please check the following website.

https://community.repo.nii.ac.jp/

[JC users of JAIRO Cloud]

Regarding the Fee, please check the following website.

https://community.repo.nii.ac.jp/

[JC users of JAIRO Cloud]

Regarding the Submission Address, please check the following website.

https://community.repo.nii.ac.jp/
